

Plasma Pen™

By Louise Walsh International

Plasma Pen USA: **Advanced Technician**

WE HEREBY CERTIFY

JODI BITTON, LE

Has successfully completed and passed our Plasma Pen USA Advanced Technician training course and is now professionally trained and fully qualified as an official Advanced Technician and plasmologist for Plasma Pen able to deliver world class plasmoplasty treatments. We confirm from the delivery of the training, our observational assessments, their knowledge of anatomy and physiology and professional validation of their past treatments that they are academically and practically skilled in the theory, science, technique, treatment and aftercare involved in using our plasma device, methodology, technique and associated products for non-surgical and non-invasive fibroblasting, skin lifting, skin tightening, resurfacing, revitalization, regeneration and rejuvenation via soft surgery plasma sublimation. We certify the purchase of an official German manufactured, CE Certified and FDA Registered Plasma Pen USA by Louise Walsh International™ device with warranty. The technician has been provided with exclusive access to all our best practice resources for their continual professional development.
